

THREE PHASE ANGLE CONTROLLER

- Adapted to three phase star (without neutral) or delta connected loads (other wiring configurations on demand)
- Very low initial value regarding competition
- Small housing.
- Large mains frequency and voltage range.
- Fully opto-isolated full cycle three phase, phase angle controller (balanced currents, less harmonics, ...)
- Lot of possible options on demand (ramps, additional settings...).

Mains Voltage	Mains Frequency	Max AC-51 Current	Control Input	In / Out / Case Insulation	Type of connections	Dimensions (WxHxD)	Weight
300 to 510VAC	40 to 65Hz	50A (with heatsink)	0-5VDC	4kV	Round tabs	100x73.5x39.5 (mm)	350g

	Voltage drop	EN61000-4-11	-	

E.M.C. EMISSION	Radiated and conducted disturbances	NFEN55011	The conducted or radiated disturbances generated by solid-state relays depend on the wiring and load configuration. The test method recommended by the European standards and concerning electromagnetic compatibility leading to results far from reality, we decided to advise our customer in order to adapt their filtering scheme to their application. Please contact us if you are concerned about E.M.C.
