

HEINE mini3000® LED Ophthalmoscope

with LED illumination in HEINE Quality – LED^{HQ}

LED^{HQ}
LED NOW IN HEINE QUALITY.

- ∴ Maintenance-free pocket instrument
- ∴ Optimal colour rendering
- ∴ Up to 10 hours operation time

Modern ophthalmoscope with maintenance-free LED illumination. Its brightness and colour rendering are comparable with a HEINE XHL Xenon Halogen Ophthalmoscope.

- ∴ **Maintenance-free**, no need to ever replace the LED.
- ∴ LED Thermal management for a **consistent light output throughout the whole working life**.
- ∴ **LED in HQ**: The new standard in LED illumination defining optimal light intensity, homogeneity and colour rendering for the most accurate diagnosis. Red is red, blue is blue. Colour temperature: 4,000K, Colour Rendering Index (CRI) >95, special index for red colours (R9) >90 on a maximum scale of 100.
- ∴ **Exclusive Battery Performance Indicator**: When the instrument is switched on, the maximum light intensity is shown, then the light intensity is regulated down to the level that corresponds to the current charge status of the battery so you know when your batteries need changing.
- ∴ **Exclusive fade-out function** reduces illumination intensity with battery level to let you know when to replace.
- ∴ **Operation time up to 10 hours**. The batteries need to be changed less often and the rechargeable batteries last longer.
- ∴ **For further technical specifications, please see mini3000 Ophthalmoscope with XHL illumination on page 043.**
