Software ASIMON V3 G2   AS-i Safety at Work

Product characteristics

| Software ASIMON V3 G2 |
| Configuration, set-up and diagnostics of the AS-i safety monitor |
| AC041S |

Application

Application	Programming software for the AS-i safety monitor AC041S
Function	The software is used for the configuration and set-up of the AS-i safety monitor by means of a PC. An easy-to-use user shell enables the configuration of the AS-i safety monitor in conjunction with safe AS-i slaves, such as e-stops, door safety switches, safety light barriers etc. within an AS-i bus system for almost all applications as protection in dangerous areas of motor-driven machines. ASIMON V3 G2 also supports the set-up and the documentation of your safety-related application.
