SLIDE POTENTIOMETERS

April 17, 2019

Bourns Announces Change to Housing of the Motorized Slide Potentiometer

Model PSP01 Series

In the spirit of continuous improvement, effective July 15, 2019, Bourns is making a change in the stamping of the housing of the Model PSP01 Motorized Slide Potentiometer. Currently, there are two non-functional recessed rectangles measuring 51.8 mm wide x 13.7 mm high x 0.3 mm deep. This change will remove the non-functional recessed rectangles, resulting in ease of manufacturability of the product.

This change will not affect the function, quality or reliability of the product. The form will change due to the visible difference in the shape of the housing and the fit on the top will change slightly with the removal of the non-functional recessed rectangles. Products can be identified by the date code 1929. Below is a list of affected part numbers.

Affected Part Numbers

[PSP01-082A-103B1](#)

[PSP01-082A-103B2](#)

Implementation dates are as follows:

Last time to buy existing products: **July 15, 2019**

Date manufacturing of existing products will cease: **July 15, 2019**

Date of deliveries of modified products: **August 15, 2019**

First date code using the above changes: **1929**

If you have any questions or need additional information, please feel free to contact [Customer Service/ Inside Sales](#).

Users should verify that the described changes will not impact the performance of the product in their specific applications.
