

CT Meter For AC Current Measurement

Easy to Use. Easy to Read.

Featuring an acclaimed easy to read display combined with easy to use functionality, and featuring a high resolution input, the CT Meter is the third and newest addition to the Advanced Panel Meter, (APM), product group to measure current.

The APM CT Meter completes the range alongside the Amp Meter and Shunt Meter, enabling all types of accurate current measurement to now be available. When used with an external current transformer, it is possible to accurately measure up to 10,000 amps, whilst providing a range of features including set-points and dynamic backlighting, which have made the APM range the most popular panel meter on the market today.

The programmable scale and custom annunciators features enable users to tailor the meter to display their critical parameters exactly how they want. Dynamic backlighting, in conjunction with set-points, means operators are able to be visually alerted when a parameter is out of range. The two outputs can be used to connect the APM to other systems in the process, meaning the APM CT Meter is much more than just a display.

Key Features

Large multi-format display that incorporates:

- 40 segment bar graph display
- Large 4-digit display
- · Separate Starburst display area for annunciators, custom messages and alarm information
- Dynamic backlight colour

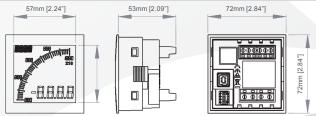

Programmable:

- Display Range (Both Min & Max Values)
- · Custom annunciators
- · User-selectable backlight color and intensity
- · Two independent alarm set-points
- Two independent outputs
- 4-20mA analogue monitor output

Visibility:

- · User-adjustable backlight brightness and colour
- Large display
- Wide viewing angle (horizontal and vertical)
- · Custom annunciators

Dimensions:

Panel cutout: 68mm x 68mm [2.68" x 2.68"] as per DIN43700/IEC61554
