VBA-4E-KE-ZEJQ

KE switch cabinet module 4 inputs (PNP)

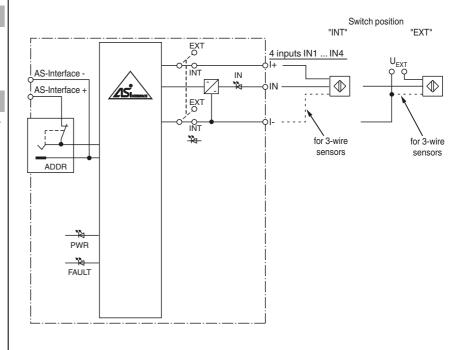

Features

- Housing with removable and color coded terminals
- · Communication monitoring
- Inputs for 2- and 3-wire sensors
- Addressing jack
- Selectable supply to the sensors: External or from the module
- Function display for bus, internal sensor supply, and inputs
- A/B slave with extended addressing possibility for up to 62 slaves

Dimensions

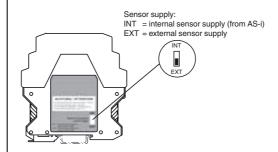

Electrical connection

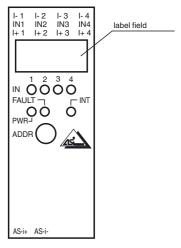

Indicating / Operating means

ATTENTION

Do not connect the terminals I+, IN and I- with any external potential when switch set to "INT"

Technical data		
General specifications		
Slave type		A/B slave V3.0
AS-Interface specification Required master specification		V3.0 ≥ V2.0
UL File Number		E87056
Indicators/operating means		
LED FAULT		Fault display; Red LED red: Communication fault or address is 0 red, flashing: Overload, internal input supply
LED INT		Internal input supply active; LED green
LED PWR		AS-Interface voltage; green LED green: voltage OK flashing green: address 0
LED IN		switching state (input); 4 LED yellow
Electrical specifications		
5 6 1 7	J _{EXT}	12 30 V DC PELV
	J _e	26.5 31.6 V from AS-Interface ≤ 30 mA (without sensors) / max. 180 mA
Rated operating current I Protection class	е	S 30 HIA (WILLIOUT SELISOIS) / HIAX. 100 HIA
Surge protection		U _{FXT} , U _e : Over voltage category III, safe isolated power supplies
3. p		(PELV)
Input		
Number/Type		4 inputs for 2- or 3-wire sensors (PNP), DC
Supply Voltage		from AS-Interface (switch position INT, basic setting) or external U_{EXT} (switch position EXT) 21 31 V DC (INT)
Current loading capacity		≤ 150 mA, overload- and short-circuit protected (INT)
Input current		≤ 9 mA (limited internally)
Switching point		according to DIN EN 61131-2 (Type 2)
0 (unattenuated)		≤ 3 mA
1 (attenuated)		\geq 5 mA
Signal delay		< 1 ms (input/AS-Interface)
Programming instructions		
Profile		S-0.A.0
IO code		0

Function

The AS-Interface I/O module VBA-4E-KE-ZEJQ is a control cabinet module with 4 inputs. The housing is only 22.5 mm wide and takes up little space in the control cabinet. The module is mounted by snapping onto the 35-mm DIN rail in compliance with EN 50022.

The connection is made via plug-in terminals. Four-terminal blocks (black) are used for the inputs. The connection of AS Interface is via a 2-terminal block yellow.

The supply to the inputs and the connected sensors can be fed either from the internal supply of the module (from the AS-Interface) or via an external voltage source. A switch located on the side of the module changes the supply source. The choice of internal input supply is displayed via the LED INT. The LED IN display the current switching status of the relevant inputs.

Note:

Filters that suppress pulses with a duration of 2 ms or less at the inputs can be connected via the parameter P1.

Parameter P2 activates the synchronous mode. A signal indicating an overload of the internal input supply is transmitted to the AS-Interface master via the 'peripheral fault' function. Communication via the AS-Interface continues even if a peripheral fault is set.

Accessories

VBP-HH1-V3.0-KIT

AS-Interface Handheld with accessory

VBP-HH1-V3.0

> Date of issue: 2014-01-13 Release date: 2011-09-08 13:25

 Input
 EN 61131-2:2004

 Protection degree
 EN 60529:2000

 Fieldbus standard
 EN 50295:1999, IEC 62026-2:2006

Notes

Do not connect inputs and outputs, which are supplied via the module from AS-interface or via auxiliary power, with power supply and signal circuits with external potentials.
