

Product/Process Change Notification

a YAGEO company

PCN-121523-AGA Auto

Dielectric material formulation change.

	Product Line: SMD MLCC C0G	ID Number (MMDDYY): 121523
Affected Products	Parts affected: see table below	C-specs: AUTO, 3020, 3083, 3123, 3124, 3112
	Grade: Automotive	Termination: 100% Sn & Flexible Termination Automotive

Change: (see specifics under change details below)

Due to equipment and dielectric material capability KEMET is changing dielectric formulation to ensure supply of MLCCs and meet increasing customer demand. Currently, the affected MLCCs use a 50V design for the 10V, 16V, 25V and 50V rated options. This PCN will change the 10V, 16V, 25V, and 50V rated options to utilize an existing 100V design. Qualification testing has been performed in accordance with the requirements of AEC Q200. With this PCN, the MLCC color will change from white to brown without any changes to electrical specifications nor changes to ordering part number. See "Change Details" table below for dimensions and reeling quantities.

Characteristic	Current	Planned
Rated Voltage	50V	50V
Design Voltage	50V	100V
Color	White 	Brown
