

# Automotive N-Channel 80 V (D-S) 175 °C MOSFET

## FEATURES

- TrenchFET® Gen IV power MOSFET
- AEC-Q101 qualified
- 100 % R<sub>G</sub> and UIS tested
- Thin 1.9 mm height
- Material categorization  
for definitions of compliance please see [www.vishay.com/doc?99912](http://www.vishay.com/doc?99912)

| PRODUCT SUMMARY                                   |                 |
|---|-----------------|
| V <sub>DS</sub> (V)                               | 80              |
| R <sub>DS(on)</sub> (Ω) at V <sub>GS</sub> = 10 V | 0.0023          |
| I <sub>D</sub> (A)                                | 245             |
| Configuration                                     | Single          |
| Package   | PowerPAK 8 x 8L |

| ABSOLUTE MAXIMUM RATINGS (T <sub>C</sub> = 25 °C, unless otherwise noted) |                                   |                         |                 |
|---|-----------------------------------|-------------------------|-----------------|
| PARAMETER   | SYMBOL                            | LIMIT                   | UNIT            |
| Drain-source voltage  | V <sub>DS</sub>                   | 80                      | V               |
| Gate-source voltage   | V <sub>GS</sub>                   | ± 20                    |                 |
| Continuous drain current  | I <sub>D</sub>                    | T <sub>C</sub> = 25 °C  | 245             |
|   |                                   | T <sub>C</sub> = 125 °C | 141             |
| Continuous source current (diode conduction)                              | I <sub>S</sub>                    | 245                     | A               |
| Pulsed drain current <sup>a</sup>   | I <sub>DM</sub>                   | 770                     |                 |
| Single pulse avalanche current  | I <sub>AS</sub>                   | L = 0.1 mH              | 58              |
| Single pulse avalanche energy   |                                   |                         | E <sub>AS</sub> |
| Maximum power dissipation   | P <sub>D</sub>                    | T <sub>C</sub> = 25 °C  | 357             |
|   |                                   | T <sub>C</sub> = 125 °C | 119             |
| Operating junction and storage temperature range                          | T <sub>J</sub> , T <sub>stg</sub> | -55 to +175             | °C              |
| Soldering recommendations (peak temperature) <sup>c</sup>                 |                                   | 260                     |                 |

| THERMAL RESISTANCE RATINGS |                   |       |      |
|----------------------------|-------------------|-------|------|
| PARAMETER                  | SYMBOL            | LIMIT | UNIT |
| Junction-to-ambient        | R <sub>thJA</sub> | 40    | °C/W |
| Junction-to-case (drain)   | R <sub>thJC</sub> | 0.42  |      |

### Notes

- Pulse test; pulse width ≤ 300 μs, duty cycle ≤ 2 %
- When mounted on 1" square PCB (FR4 material)
- See solder profile ([www.vishay.com/doc?73257](http://www.vishay.com/doc?73257))

| SPECIFICATIONS ( $T_C = 25\text{ }^\circ\text{C}$ , unless otherwise noted) |               |   |   |      |        |           |               |

**Notes**

- Pulse test; pulse width  $\leq 300\text{ }\mu\text{s}$ , duty cycle  $\leq 2\%$
- Guaranteed by design, not subject to production testing
- Independent of operating temperature

Stresses beyond those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

TYPICAL CHARACTERISTICS (T<sub>A</sub> = 25 °C, unless otherwise noted)

Safe Operating Area

Note

- a. V<sub>GS</sub> > minimum V<sub>GS</sub> at which R<sub>DS(on)</sub> is specified

**THERMAL RATINGS** ( $T_A = 25\text{ }^\circ\text{C}$ , unless otherwise noted)

**Normalized Thermal Transient Impedance, Junction-to-Case**

**Normalized Thermal Transient Impedance, Junction-to-Ambient**

Vishay Siliconix maintains worldwide manufacturing capability. Products may be manufactured at one of several qualified locations. Reliability data for Silicon Technology and Package Reliability represent a composite of all qualified locations. For related documents such as package / tape drawings, part marking, and reliability data, see [www.vishay.com/ppg?62006](http://www.vishay.com/ppg?62006).

## Disclaimer

ALL PRODUCT, PRODUCT SPECIFICATIONS AND DATA ARE SUBJECT TO CHANGE WITHOUT NOTICE TO IMPROVE RELIABILITY, FUNCTION OR DESIGN OR OTHERWISE.

Vishay Intertechnology, Inc., its affiliates, agents, and employees, and all persons acting on its or their behalf (collectively, "Vishay"), disclaim any and all liability for any errors, inaccuracies or incompleteness contained in any datasheet or in any other disclosure relating to any product.

Vishay makes no warranty, representation or guarantee regarding the suitability of the products for any particular purpose or the continuing production of any product. To the maximum extent permitted by applicable law, Vishay disclaims (i) any and all liability arising out of the application or use of any product, (ii) any and all liability, including without limitation special, consequential or incidental damages, and (iii) any and all implied warranties, including warranties of fitness for particular purpose, non-infringement and merchantability.

Statements regarding the suitability of products for certain types of applications are based on Vishay's knowledge of typical requirements that are often placed on Vishay products in generic applications. Such statements are not binding statements about the suitability of products for a particular application. It is the customer's responsibility to validate that a particular product with the properties described in the product specification is suitable for use in a particular application. Parameters provided in datasheets and / or specifications may vary in different applications and performance may vary over time. All operating parameters, including typical parameters, must be validated for each customer application by the customer's technical experts. Product specifications do not expand or otherwise modify Vishay's terms and conditions of purchase, including but not limited to the warranty expressed therein.
