26th Nov 2012

KEMET Customer Change Notification

CCN-020112-CWF

Up date information

Following the recent announcement of Phasing Out all Ta MnO₂ SMD products from Evora, Portugal and consequent consolidation in Matamoros and Vitoria, Mexico, **KEMET will place on hold CCN-020112-CWF**, which involves replacing the silver paint used for the counter electrode layer with plated nickel.

This will allow the team time to focus and execute the consolidation plan in a timely manner.

An announcement will be issued when the team resumes work on CCN-020112-CWF. Until that time no samples will be available for customer request.
