Square D by Schneider Electric 9001 BW Pendant Station

Robust BW pendant performance with the added convenience of external strain relief

Perfect for simple applications that require control units that are specifically designed for hoisting applications, the Square D™ by Schneider Electric™ 9001 BW pendant station is a pre-assembled, two-button station that is recognized for its sturdiness and resistance to both mechanical shocks and chemical agents.

Oversized finger grips on the rear of the enclosure make it easy to grip and operate and include external strain relief as a standard option. Enclosures are available in three colors and, for added convenience, push buttons have interchangeable legend inserts. All universal stations have double circuit blocks (1 N.O./1 N.C.) on each button and come without legends so they can be assembled to fit the application.

Schneider Electric, a world leader in control and signaling components, continues to provide innovative and efficient operator interface solutions with the Harmony™ range of push buttons.

Key features:

- Easy to hold in one hand with contoured grip
- Single-speed or two-speed buttons
- Momentary or maintained contact
- Available with or without mechanical interlocks
- Yellow, black, or red enclosure options
- High-impact thermoplastic enclosure with self-extinguishing flammability rating (UL 94V)
- NEMA® 1, 3, 3R, 4, 4X, and 13 water-tight, dust-tight, oil-tight, and corrosion-resistant
- UL listed, CSA approved, carries CE marking

Make the most of your energy℠
