raaco ✛ Efficiency thru order

Keeping things in order means you are in control

"Can anyone tell me where it is" - a simple call for the need to have things sorted out that can lead to delay and extra expense. Order, on the other hand, creates control, calm and results. And these are the principles that drive raaco A/S, a company that applies a systematic approach to the design and development of flexible storage systems. Order gives overview and saves time - because things are organised. That means a level of control that can be felt in the process and on the bottom line. Order creates results - it's as simple as that.

Design for the future and with the environment in mind
raaco is an advanced, well-proven system designed to last. Each product group is designed so that its components fit together, can be stacked, changed around and organised to suit the individual. For example: inserts dating from 1982 still fit into the latest CarryLite trays - and will continue to do so. The system is designed to be used, with rounded corners and ergonomic handle to make it a pleasure to work with. All storage boxes are made of strong, highly durable and impact-resistant materials. Physical and practical. That not only means overview now, but creates reassurance and results for planning and systematisation far into the future.

raaco's products are designed according to the DFD principle (Design for Disassembly), and mean that the products can be disassembled. That makes it possible to replace parts that are broken, helping protect the environment by cutting down the need to throw materials away.

Made in Denmark
raaco is designed and made in Nykøbing Falster, and we are immensely proud that our products generate such interest at home and abroad. raaco is currently in use in over 20 countries, creating order in everything from small enterprises to the Airbus Group, one of the biggest companies in Europe.

Table of contents

You create the order and overview you need

raaco inserts mean you can group and sort items to your own requirements.

There are 20 insert variants that fit the 3 systems in height, width and depth: Boxxser, CarryLite and Assorter. By using the wide range of inserts, you can organise your raaco product to suit your own requirements - and change it at will. The inserts and contents stay in place, thanks to the special fitting system. The loose inserts also make it easy to get hold of even the smallest items.

✚ Our inserts fit any of the raaco product range. Move any insert to where you want to use it.
See all inserts at www.raaco.com

✚ The lids are designed with raised profiles to ensure that even the smallest components remain in their place when they are closed. The sorted contents will not become mixed up, e.g. during transport. That's good order.

Order creates results and job satisfaction

raaco has specialised in developing the best, simplest storage systems for industry and professional use all over the world since 1956. Our approach is highly focused and simple. It's all about order. Not just for the multitude of components, tools and small items vital to production, but also in the mind.
Order gives overview, control and reassurance, enhancing job satisfaction for everyone.

Room for good ideas that last
When the workplace is tidy, with all the important small items and accessories sorted into the right boxes and compartments, thinking clearly is easier. There's room to see things from a new angle and to achieve even better results. That's how we work ourselves at raaco. And that's why we can continue to develop new, innovative and detailed solutions that last.

Design awards have to be lived up to
raaco has been awarded a host of international and Danish awards for excellent industrial design over the years. Naturally, that's something we are proud of. They also have to be lived up to. That's why we are so particular, setting high standards for the durability, function and details of our systems. We always seek to maintain such standards with regard to ideas, the design itself and choice of materials.

The environment in mind
raaco is very concerned about the environment, and we go to a lot of trouble to ensure that product development and production are environment-friendly. What that means in practice is that we work hard to minimise our impact on the environment and our employees. This policy is expressed in the comfortable working environment in which our employees create robust, highly durable and environment-friendly solutions. This is to the benefit of everyone - including the environment.
