### Select Bourns® Model SDR0503 Series SMD Power Inductors

#### *Addition of Manufacturing Site*

Riverside, California – April 25, 2023 – In order to support our fast-growing demand and enhance continuity of supply, effective June 30, 2023, Bourns will establish a new additional manufacturing site in China for select [Model SDR0503 Series SMD Power Inductors](#). A list of affected part numbers is included below.

#### Affected Part Numbers

SDR0503-100ML

SDR0503-120ML

SDR0503-150ML

SDR0503-180ML

The new additional manufacturing plant in China uses the same design, material, and manufacturing process as the existing plant. The power inductors produced at the additional manufacturing site will meet the same data sheet specifications as the inductors from the existing plant.

The form, fit, function, quality, reliability, production lead time and country of origin of these inductors from the new manufacturing plant will be the same as those of the existing plant. Traceability will be maintained through lot code and date code.

Samples of inductors made at the new additional manufacturing site are available upon request. Bourns recommends that customers test samples of the affected part numbers from the new manufacturing plant in their specific applications for verification of satisfactory performance.

#### Implementation dates are as follows:

Date that deliveries of products manufactured at both manufacturing sites will begin: **June 30, 2023**

First date code using the above changes: **2326**

Orders for the affected part numbers received after June 30, 2023 may be filled interchangeably from the existing manufacturing plant or the new additional manufacturing plant.

*If you have any questions or need additional information, please feel free to [contact Customer Service/Inside Sales](#).*

*Users should verify that the described changes will not impact the performance of the product in their specific applications.*
