

1 to 3 HUB Unit

Description

HUB is one of the six Units in M5GO, allowed buy separately. This Units is used for GROVE port expanding. Notice: **HUB** is just a hardware expander, if you are looking for hardware and software(standard protocol) expander like I2C, Single-bus, please check **PaHUB** or **PbHUB**. If you connected two I2C slave devices onto **HUB** that share the same adress, you will have problem getting I2C data from both.
