Kraftform Kompakt user-specific sets

Special sets

Kraftform Kompakt user ranges – the new special sets – compact yet very versatile. Suitable for all sanitary, wood, metal or electrical applications.

Kraftform Kompakt M1 Metall

Compact tool set with the 39 most important screwdriving tools for jobs involving metal.

Zyklop “6 in 1”

1. Fine-tooth ratchet 2. Flex-head ratchet 3. Angle ratchet 4. Quick-release ratchet 5. Power ratchet 6. Screwdriver

Fast movers

The Zyklop Speed ratchets are really fast movers. The gyrating mass design means that screwdriving is accelerated. The rotation-symmetric structure of the Kraftform handle and the free-turning sleeve reinforce this rapid twisting process, particularly when the ratchet does not engage due to too little resistance in the thread.

Manual and machine sockets

The manual and machine sockets can be used both for hand and power tools use (non-impact). Users need just one socket set for all applications.

Combination drill bits

Combination drill bits • Application: Core-hole drilling, tapping and deburring in one operation • 1/4" drive suitable for holders as per DIN 3126-D 6.3 (ISO 1173) • Hexagon shaft for very high torque transfer • HSS = high speed steel • Finely adjusted material elasticity for long service life • Excellent centring properties • Straightforward cutting • Perfect chip removal • Low jamming risk • Precise return control

Handle/interchangeable blade system

The handle/interchangeable blade system allows rapid exchange of the blades required for a wide range of applications.

Textile boxes

The textile boxes offer dramatically improved portability, and are space-saving to boot! This means you can now carry the same collection of tools, in a much more compact and comfortable package. The hassle of running back and forth for the right tools has now become a thing of the past. And the much lower weight of a set makes carrying more convenient than ever before. The textile box including the tool will even survive a fall undamaged.
