

Spring balance

Spherical probe

ATORN®

Application

For testing and setting control elements with adjustable friction moments, contact forces in electrical switch gears and regulating and controlling elements in motor vehicles.

Version

- Measuring possible in both directions
- Dial face with scale in centinewtons (cN) or newtons (N)
- Error limit 0.01 x (final value + measured value)
- Trailing pointer

Delivery

In case

Art. no.	44100 091
Min./max. force of measuring range	50-500 cN
Scale value, force	10 cN
Meter diameter	72 mm
Sensor length	48 mm
Weight	260 g

EAN-Code

4050293187359
