OPTIGA TRUST M IOT KIT

Überblick

Easy-to-use kit with the OPTIGA™ Trust M for your IoT device security use case

The OPTIGA™ Trust M IoT Security Development Kit is the easiest way to develop and evaluate end-to-end security use cases for your IoT devices.

The kit enables customers to prototype various security use cases and build full-featured IoT applications. The board includes:

- OPTIGA™ Trust M security solution
- PSoC™ 62, an Arm® Cortex®-M4/M0+ microcontroller
- AIROC™ CYW43012 Wi-Fi & Bluetooth® combo chip is a low power device that supports dual-band (2.4 and 5.0 GHz) Wi-Fi and Bluetooth® 5.0.

This development board is delivered with two ready-to-use security use cases:

- Secured communication with AWS over MQTT using AnyCloud with crypto support from the OPTIGA™ Trust M.
- Secured zero-touch cloud provisioning using CIRRENT™ Cloud ID and the pre-provisioned X.509 certificate delivered with the OPTIGA™ Trust M.

You can also use this development kit to build additional IoT security use cases such as IP protection, crypto offloading, secured firmware updates, and more.

The kit is supported by ModusToolbox™. The OPTIGA™ Trust M host library is available as open source code under [MIT LICENSE](#) (<https://github.com/Infineon/optiga-trust-m/blob/master/LICENSE>) on our GitHub repository (<https://github.com/Infineon/optiga-trust-m>).

Zusammenfassung der Merkmale

- OPTIGA™ Trust M IoT Security Development Kit featuring Adafruit Feather compatibility, OPTIGA™ Trust M, PSoC™ 62 MCU and AIROC™ Wi-Fi + Bluetooth® combo
- Pre-configured kit with two security use cases:
 - AnyCloud MQTT connectivity to AWS
 - Secured zero-touch cloud provisioning using CIRRENT™ Cloud ID
- ModusToolbox™ support

Vorteile

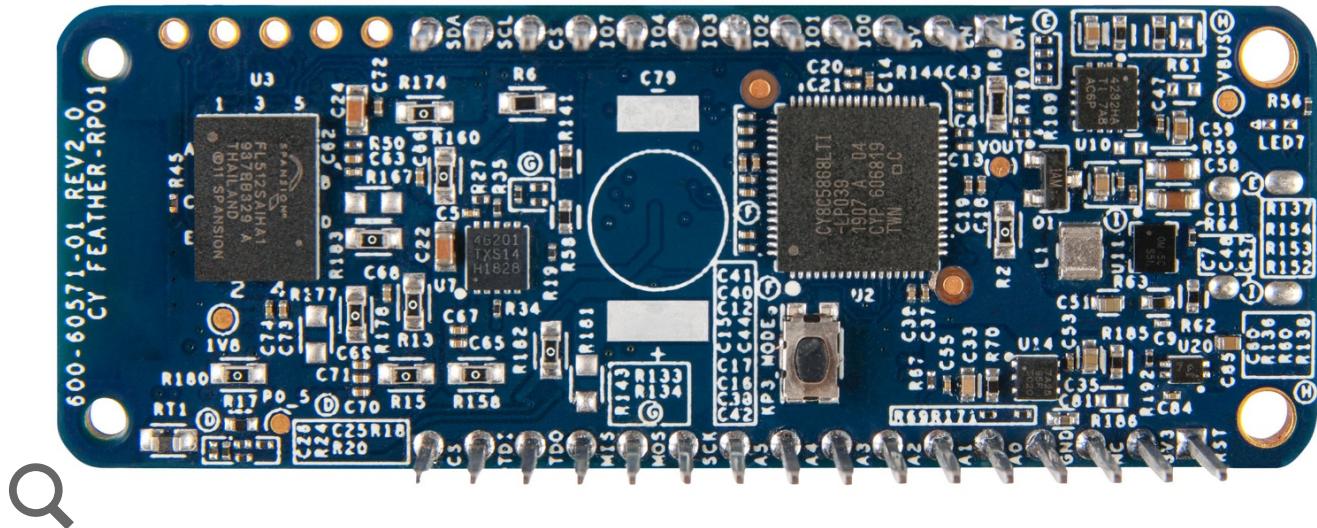

- Instant evaluation of secured cloud communication and secured cloud provisioning use cases
- All main board components are provided by Infineon and supported via ModusToolbox™
- Flexibility to quickly develop full-featured IoT device prototypes

Potentielle Zielanwendungen

- Smart homes (</cms/en/applications/smart-home-building/>)
 - Smart buildings (</cms/en/applications/smart-home-building/home-building-automation/>)
 - Industrial automation / PLCs (</cms/en/applications/industrial/industrial-automation/programmable-logic-controller-plc/>)
- Robots (</cms/en/applications/robotics/industrial-robots/>)

Parameter

Parametrics	OPTIGA TRUST M IOT KIT
Family	Security
Input Type	DC
Product Description	The OPTIGA™ Trust M IoT Security Development Kit is the easiest way to develop and evaluate end-to-end security use cases for your IoT devices. The kit enables customers to prototype various security use cases and build full-featured IoT applications. The board includes: 1. OPTIGA™ Trust M security solution 2. PSoC™ 6, an Arm® Cortex®-M4/M0+ microcontroller 3. AIROC™ CYW43012, an ultra-low-power single-chip combo device featuring 1x1 dual-band 2.4 GHz and 5 GHZ Wi-Fi 4 (802.11n) and Bluetooth 5.0
Qualification	Industrial ; Consumer

Parametrics	OPTIGA TRUST M IOT KIT
Sub Application	Cloud authentication ; Device authentication ; Secured cloud communications ; IP Protection ; Secured SE/FW updates
Supply Voltage min max	3.6 V 4.2 V
Target Application	Smart Home ; Smart Door Lock ; Industrial Automation (PLC, Drives) ; Surveillance Cameras ; Smart Lighting ; Smart Building

Bestellung

Produktnname	OPTIGA TRUST M IOT KIT
OPN ! Info	TRUSTMIOTSDKTOBO1
Produktstatus	active and preferred
Gehäusename	--
Standard Package name	
Onlinebestellung	
Bleifrei	yes
Halogenfrei	
RoHS konform	yes
Verpackungsgröße	1
Verpackungstyp	CONTAINER
