

## Aka-Stick Mono diamond stick

monocrystalline

### Application:

For initial wetting of new polishing cloths. Especially suitable for polishing metals.

### Execution:

- monocrystalline
- compatible and usable with water, glycol and ethanol-based lubricants
- contains less than 0.1% water

### Advantage:

- easier to use than diamond pastes
- high concentration of 250 carat/litre, for a high removal rate
- contains less than 0.1% water and is therefore also suitable for water-free preparations
- also ideal for use during the polishing process
