

VITO portable filter device

Suitable for all tank sizes

Application:

The VITO® can be used to quickly and easily clean inside the machining system: All of your coolant can be maintained and cleaned in no time – the VITO's patented, mechanical micro-filtration process only takes a few minutes. The result is clean, high-quality coolants, oils and aqueous solutions – free from chips and solid materials.

Execution:

- Filtration capacity up to 95 litres per minute
- Filtration rating: 20 µm nominal/5 µm absolute
- Cycle period of 10 minutes (can be adjusted)
- Electrical unit and filter box are made of stainless steel 1.4301
- Device is easy to disassemble

Advantage:

- Cleaning and ventilation of coolants, oils and aqueous solutions
- Reduced tool wear, quick amortisation
- Reduced germs and odours
- Fast, automatic pressure-flow-filtration
- Low disposal costs

Art. no.	18300 237
Brand	VITO
Manufacturer Part Number	102411
Gross Weight	7.700 kg
Product Group	147
