

Aluminium pallet

Carrying capacity up to 1000 kg

Application:

For storage and transport in clean rooms, high-shelf warehouses, assembly line plants, warehouses storing hazardous materials and refrigerated and quarantined warehouses.

Execution:

- Cover frame from rectangular profile 80 x 30 mm with integrated middle bar
- Watertight and brushed welding seams. High-quality welding
- GMP-compliant, pallet area in line with Euro dimensions
- Deck with 4/5 longitudinal bars from rectangular profile 80 x 30 mm with integrated central bar
- 2 longitudinal skids made of trapezoidal profile 80 x 22 mm with integrated central bar and central support

Advantage:

- Hygienic and can be used in clean rooms, easy and economical cleaning
- Taste- and odour-neutral
- Low tare weight, stable, high torsion resistance
- Long service life, corrosion-proof
- Resistant to temperature fluctuations, can be used in any weather

Art. no.	50264 252
Length	1200 mm
Width	800 mm
Height	150 mm
Load-carrying capacity	1000 kg
Number of steps	5
Material	Aluminium
Colour	Aluminium coloured
Gross Weight	20.000 kg
Product Group	504
