

Jointed hose set

MAXIFLEX® systems

Application:

Basic sets for developing an individual coolant system.

Execution:

- Made from high-quality and robust plastic
- 1/4" version with 6.35 mm internal diameter
- 1/2" version with 12.7 mm internal diameter
- Max. 6 bar operating pressure
- Adapter available for further systems

Advantage:

- Universal push-fit system
- Chemical-resistant, does not conduct electricity
- Suitable for higher coolant pressure in CNC machines
- Holds its shape, does not move under pressure or vibration
- Coolant supplied precisely where it is needed
