### More Information:

TUK's D UNIVERSAL series of connectors offers a wide variety of audio, video and data connectors all available for use in standard 'D Series' XLR type cut-outs.

Designed for rear mounting, our connectors have a pleasing flush appearance when mounted in suitable panels. All items in the range can be mounted quickly without need for any securing nuts, as our mounting plates (made from black polycarbonate or nickel plated PC/ABS according to connector type) are pre-threaded for M3 screws.

All connectors are made to relevant standards. Category 6 and 6A connectors are produced, for example, to FCC68 and to TIA/EIA 568B and have an insertion life of >750 mating cycles. All products are CE compliant (i.e including ROHS and REACH)

TUK seeks continuously to expand the range to ensure comprehensive coverage of established and new voice, A/V and data cabling technologies.
