## Extending Your Multimedia HDMI Viewing Experience

Looking to drastically extended your HD display setup to around 120 metres from your HDMI source using standard Ethernet cables?

The new LMS Data **C-HDMI-EX-02** is a professional class 1080p HDMI extender that offers superb extension distance for your HDMI TV, monitor or other HDMI displays, including audio.

Using TCP/IP transmission technology over Ethernet means you simply connect a quality Cat5e or Cat6 cable to connect the supplied Transmitter and Receiver, using existing HDMI cables for the end connections and enjoy up to around 120 metres of total length HDMI broadcasts.

Ideal for education and commercial applications that need longer HDMI signal connections, using Cat5e or Cat6 cables also means easier cable installations when compared to HDMI, and far cheaper too.

Integrated IR remote control comes as standard allowing remote device control from your existing IR controls for the likes of TVs, Home Theatres or Kiosk systems.

## specifications:

TCP/IP Ethernet signalling over standard Cat5e/Cat6 cables

**DC5V/1AMP PSU Supplied with HDMI-IN/HDMI-OUT**

Supports up to 1080p, 720p, 576p and 480p

**Extend your HDMI cabling up to around 120 metres**

Supports HDMI 1.3 signalling with HD audio on HDMI

**Integral IR remote control relay support**

Dimensions: 92mm x 79mm x 20mm (LxWxH) approx

**Ideal for Education, Commerce, Theatres and Home Theatres**
