Soft Tactile Switch Buttons

Standard input buttons for electronic projects that work best in a PCB but can be used on a solderless breadboard. The pins are normally open (disconnected) and when the button is pressed they are momentarily closed. They come in a pack of 10.

Great for projects like the PiGrrl, PiGrrl 2, Pocket PiGrrl or PiGrrl Zero since the elastomer buttons feel better than the default ones.

Product Dimensions: 7.8mm x 7.8mm x 4.9mm / 0.3" x 0.3" x 0.2"

Product Weight: 0.1g
