

SPEED SLOT carbide hole saws

Extremely powerful

Version:

- High-performance carbide is welded to the cutting edge to ensure durability and prevent tooth loss.
- The aggressive tooth design cuts through wood, steel, stainless steel, cast iron, fibre cement and plaster
- lateral, step-shaped opening to enable easy removal of the drill core
- Arbour and centring drills: See bi-metal hole saws art. 53847 300 to 321

Advantage:

- extremely long service life
- cuts virtually all materials with ease
