## RS 76 C - Full-travel key switch, illuminable, momentary

## 3.13.001.110/0000

R

▲

| General information                                   |                                       |
|---|---------------------------------------|
| Recommended key grid                                  | 19.05 mm                              |
|   |                                       |
| Mechanical design                                     |                                       |
| Contact function                                      | momentary                             |
| Mounting  | soldering                             |
| Terminals   | solder terminals, tin-plated          |
| Contact system  | contactless with Hall-IC              |
| Illumination  | with LED                              |
| Mechanical characteristics                            |                                       |
| Switching travel on                                   | 1.5 - 2.8 mm                          |
| Switching travel off                                  | 0.8 2.4 mm                            |
| Operating force max.                                  | 0.7 N                                 |
| Operating travel                                      | 4 mm                                  |
| Robustness max.                                       | 100 N                                 |
|   |                                       |
| Electrical characteristics                            |                                       |
| Operating voltage DC                                  | 4.75 5.25 V                           |
| Supply current max. at U <sub>IL</sub> = 0 V          |                                       |
|   | 0.5 mA                                |
| Supply current max. at U <sub>IH</sub> = 5 V          | <u>5 mA</u>                           |
| Input voltage (F) at U <sub>IL</sub> = 0 V            | 0.4 V                                 |
| Input voltage (F) at U <sub>IH</sub> = 2.4V           | 5.25 V                                |
| Output load current (Q) max.                          | 16 mA                                 |
| Output residual current (Q) max.                      | 10 μΑ                                 |
| Output saturation voltage (Q) max. bei 16 mA          | 0.4 V                                 |
| ESD strength max.                                     | 8 kV                                  |
| Output switching times (Q) at 25 °C, t <sub>PHL</sub> | 3 µs                                  |
| Output switching times (Q) at 25 °C, t <sub>PLH</sub> | 4 μs                                  |
| Output switching times (Q) at 25 °C, t <sub>THL</sub> | 1 µs                                  |
| Output switching times (Q) at 25 °C, t <sub>TLH</sub> | 2 µs                                  |
| Other specifications                                  |                                       |
| Reliability of Hall-IC at 25 °C                       | $\lambda = 2.5 \times 10^{-7} h^{-1}$ |
|   |                                       |

| Ambient temp. operating min.       | <u>0°C</u>                               |
|------------------------------------|--|
| Ambient temp. operating max.       | +70 °C                                   |
| Storage temperature min.           | -40 °C                                   |
| Storage temperature max. (product) | +80 °C                                   |
| Storage temperature max. (rail)    | +50 °C                                   |
| Environmental restistance          | acc. to IEC 60068-2-14, -30, -33 and -78 |
| Operating life min. (operations)   | 10 <sup>8</sup> cycle                    |
| Degree of protection               | IP40 (DIN EN 60529)                      |
| Flammability of materials          | UL 94 HB                                 |
| ROHS compliant                     | yes                                      |
| REACH compliant                    | yes                                      |
