IMX12-AO01-1I-1I-H0/24VDC/CC**

The 1-channel IMX12-AO01-1I-1I-H0/24VDC/CC signal isolator is designed to transmit the normalized current signal galvanically isolated 1:1 from the non-Ex area to the Ex-area. In addition to the analog signal also digital HART® communication signals can be transmitted bidirectionally. Typical applications are for example, the control of I/P converters or indicators in the Ex area.

The Pwr LED lights green to indicate operational readiness. The device can detect a wire break or short circuit on the field side, the input then switches to a high impedance state. A fault in the input circuit leads to a flashing red LED according to NE44.

The device can be used in safety circuits up to SIL2 (high and low demand according to IEC 61508) and meets the requirements of the NE21. It is equipped with removable cage clamp terminals.

- ATEX, IECEx, INMETRO, NEPSI, Kosha, TIIS, TR CU
- Installation in zone 2
- SIL 2
- Output circuits monitored for wire-break and short-circuit
- Complete galvanic isolation
- HART transparent
- Removable terminals
- Cage clamp terminals
