

TIMBER CONNECTOR SCREWS

High performance timber to timber fastener – ideal replacement for a coach screw

- 1 Optimum Performance, TXD Drive Washer Head**
 - TXD drive provides more points of contact for better torque transfer and helps reduce 'cam out', bit slippage and bit wear.
 - Washer head offers greater tightening force and better connections than a countersunk head even in warped board.
- 2 RMB - Nano Coating**
 - Special metal bronze coating giving MINIMUM 2000 hours protection on a salt spray test.
 - Nano coating prevents recess clogging ensuring good driver bit fit and reduces coating peel off in timber.
 - Hex-chromium free.
- 3 Slanted Rollet**
 - To reduce drag and speed up insertion.
- 4 High Specification Steel for Superior Performance**
 - Specially hardened steel gives maximum tensile and torsional strength - minimum 30° bending angle.
- 5 Two Slots**
 - Prevents splitting when screwing close to the edge.
- 6 25° Needle point**
 - Very sharp 25° point with the thread running to the end allowing immediate starting.

Characteristics

nano coating

txd drive

pan washer head

cutter slots

needle point

Applications

all wood

soft wood

hard wood

chipboard

board materials

- Slots allow the screw to work close to the edge of the material without splitting and penetrate almost all timbers without a pilot hole.
