

Spring balance

With spherical probe

Application:

For testing and setting control elements with adjustable friction moments, contact forces in electrical switch gears and regulating and controlling elements in motor vehicles.

Execution:

- Measuring possible in both directions
- Combined dial in centinewtons and grams
- Error limit 0.01 x (final value + measured value)
- Trailing pointer

Delivery:

In case

Art. no.	44101 100
Brand	CORREX
Manufacturer Part Number	7220413
Min./max. force of measuring range	100-1000 cN
Scale value, force	20 cN
Meter diameter	65 mm
Sensor length	47 mm
Weight	260 g
Gross Weight	0.340 kg
Product Group	441
