

170817142 EFR32MG13, EFR32BG13 & EFR32FG13 Revision C and Data Sheet Revision 1.0

PRCN Issue Date: 8/17/2017

Effective Date: 11/23/2017

PCN Type: Datasheet; Product Revision

Description of Change

Silicon Labs is pleased to announce hardware revision C for the EFR32MG13 Mighty Gecko Multi-Protocol, EFR32BG13 Blue Gecko Bluetooth® Low Energy and EFR32FG13 Flex Gecko Proprietary Wireless SoC families. All Rev C OPNs have achieved Full Production (FP). Datasheets and errata have been updated for these products. The new revision is a pin-compatible replacement for the previous revision B devices.

The datasheets are updated to version 1.0. Notable changes from Revision 0.5 are:

- Updated specification tables with latest characterization values and production test min/max limits
- Added high-temperature OPNs and associated specifications
- Corrected Typical Sub-GHz Impedance-matching network circuits Figure
- Updated Sensitivity in Table 4.15 (RF Receiver characteristics for Bluetooth Low Energy in the 2.4 GHz Band, 1 Mbps Data Rate) to reflect new PHY configuration that fixes Interoperability issues identified with previous PHY configuration

The Errata is updated to Revision 0.3. Revision C eliminated the following errata in revision B:

ADC_E224: ADC Warm-Up Ready Can Cause IDAC, ACMP, or CSEN to Not Function

ADC_E225: Using the ADC in High Accuracy Bias Mode Will Force All Analog Peripherals to High Accuracy Bias Mode

RMU_E203: AVDD Ramp Issue

Additionally, the following new Errata has been added since the previous revision of the document:

PLFRCO_E201: Output Frequency Error Below 0 °C Causing Bluetooth Communication

Issues

After the effective date of this PCN, Silicon Labs reserves the right to deliver product revision C for customers ordering product revision B.

Reason for Change

See Above.

Impact on Form, Fit, Function, Quality, Reliability

The new revision is a pin compatible replacement for the previous revision B devices. There have been no changes to device pin-out (fit), functionality quality or reliability.

Last Date of Unchanged Product: 11/23/2017

Qualification Samples

Samples Available upon request.

Specific conditions of acceptance of this change will be considered on a case by case basis if written notice is submitted within 30 days of this notice. To request further data or inquire about this notification, please contact your local Silicon Labs sales representative. A list of Silicon Labs sales representatives is available at <http://www.silabs.com>.

In some cases rejection of a change notice may impact Silicon Labs product pricing, delivery, quality, or reliability.

EFR32xG13 RevC 48QFN Qualification Report

Part Rev B, TSMC Fabrication, SPIL Assembly							
Test Name	Test Condition	Qualification	Lot ID or Start	Fail/Pass or End	Notes	Summary	Status

Notes:

1. Parts are Pre-conditioned at MSL2/260°C
2. Dual-band bondout option
3. Sub GHz bondout option
4. 2.4 GHz bondout option
5. Failure analysis on the failure was inconclusive. An additional 30 units were stressed from the same assembly lot (Q040220) to reduce the LTPD% below the requirement. JEDEC sample size requirement of 25 units per lot has LTPD% = 9.21 at 90% confidence with 0 fails. With larger sample size = 60, LTPD% = 6.48 at 90% confidence with 1 failure.
6. Preconditioned with 10K write/erase cycles at 25°C
7. Preconditioned with 10K write/erase cycles at 125°C
