Two-Way Speaker Switch Box

MCM Part #: 50-6185 | Distributed By MCM Part #: 50-6185

Two-Way Speaker Switch Box

Tabletop control box allows selection of A/B speaker pairs. Internal 220ohm resistors ensure that amplifier always sees a load, even with both switches off.

With both speaker switches in "on" position, speaker pairs are connected in series, allowing use of 4ohm or 8ohm speaker systems, without damage to amplifier. 200W maximum power capacity. All connections are push type.

Features

- Dimensions: 6.9" (W) x 2.2" (H) x 3.9" (D)
- Sloped front
- Black color
- 200W maximum power capacity
- Metal case
- Non-skid rubber feet
- Internal 220ohm resistors
