

▶ GUIDE 6330 CPN

A heavy and very versatile glove with cut-, puncture- and needle protection. The CPN technology in the palm and over the fingertips protects from needles and sharp objects. Even the back of hand is protected since the glove is knitted in fibres with cut protection level F. This glove also protects your hands from being wet since the liner has a water repellent treatment and the dipping is water resistant.

Typical applications: Industry, cleaning, construction and craft applications, when there are risks of cut-, puncture- and needle injuries.

- 4 layers of protective mesh in the palm.
- 2 layers of protective mesh on the palmside of the fingers and over the fingertips.
- Cut protection fibre level F
- Nitrile knuckle dipped
- Sizes 8-11
