## BB6K001

Part Number

- **Compact, rugged aluminum housing in 29 x 49.1 x 29 mm format**
- **Image chip with Global Shutter for dynamic applications**
- **Various lenses can be mounted thanks to standard thread**

Digital cameras make it possible to record images in vision applications. The images are read out via a 1-gigabit Ethernet interface. The camera can be connected via a PoE port so that only one cable is required. The small and rugged aluminum housing, as well as the C mount threaded connection, can be easily and flexibly integrated. The high-performance Sony Pregius image chip ensures high frame rates, optimum image quality without noise under difficult lighting conditions and extremely sharp images even in dynamic applications thanks to the Global Shutter.
