

3-point internal micrometer Holtest

Series 368

Mitutoyo

Application:

For measuring through-bores and short centring attachments

Execution:

- Semi-gloss chrome-plated scale drum and sleeve
- 2–6 mm: Cemented carbide
- 6–12 mm: titanium-coated carbide
- 12–300 mm: titanium-coated hardened steel

Advantage:

- Titanium-coated measuring faces provide excellent durability and impact resistance

Delivery:

Includes box, adjustment key, factory test certificate, no setting ring or extension
