

HDMI USB camera set for TM microscope

For MIUTUTOYO measuring microscopes TM-505B and TM-1005B

Mitutoyo

Application:

The HDMI6MDPX digital camera used in the eyepiece tube transforms the TM microscope into a digital microscope. Set consists of 1x HDMI6MDPX camera, optical 0.37x adapter, mechanical adapter.

Advantage:

- HDMI6MDPX, six-megapixel colour camera with direct HDMI output to a monitor. No PC required.
- Integrated SD card for storing images and pre-installed software to perform basic measurements on the screen.
- Intuitive operation of the software using the standard USB mouse provided
