

PICFlash Experimental Board

PID: MIKROE-149

The **PICFlash Experimental Board** makes the process of programming MCUs easier. There are 8-, 10-, 14-, 18-, 28- and 40-pin DIP sockets provided on the board. There is also an on-board 40-pin ZIF Socket for easy handling of microcontroller.

Mikroe produces entire development toolchains for all major microcontroller architectures.

Committed to excellency, we are dedicated to helping engineers bring the project development up to speed and achieve outstanding results.

ISO 27001: 2013 certification of informational security management system.
 ISO 14001: 2015 certification of environmental management system.
 OHSAS 18001: 2008 certification of occupational health and safety management system.

ISO 9001: 2015 certification of quality management system (QMS).

Specifications

Type	Miscellaneous
Architecture	dsPIC/PIC24 (16-bit),PIC (8-bit),PIC32 (32-bit)
Interface	External
Silicon Vendor	Microchip

Mikroe produces entire development toolchains for all major microcontroller architectures.
