TE would like to inform you of the following change(s) to the listed TE Connectivity Product. In case of any further questions about this change(s), please contact your TE Connectivity Sales Engineer. Affected part, drawing and/or specification numbers are listed on the attached sheet(s).

## General Product Description:

AMP MCP 2.8

## Description of Changes

Remove section 4.3 E from application specification 114-18148-0 (german language version) and 114-18148-1 (english language version): "E Burr on base of crimp In contrast to specification 114-18022 the burr on the base of the crimp may not exceed 0.15mm." In future the burr on the base of the crimp will be specified in accordance to the general crimp specification 114-18022. For easier handling the dash versions of application specification 114-18148 will be summarized superseded by the base number 114-18148 as double language document.

## Reason for Changes:

Document clarification. There is no technical reason to specify the burr on the base of the crimp with smaller tolerances for the AMP MCP 2.8 contacts, when similar contact systems also refer to the general crimp specification 114-18022.
