CORE TECHNOLOGIES

Verbatim has always been at the forefront of technological innovation. We are able to maintain our leadership and market the very latest products and technologies due to the extensive research and development that is undertaken by parent company Mitsubishi Kagaku Media in Japan.

We pride ourselves on our 'Core Technologies'.

Ultimate resistance to UV light for increased protection and reliability. High quality picture and sound with more than 100 years archival. Used in BD-R LTH type, DVDR and CD-R discs.

A special recording layer present on Verbatim's CD-RW, DVD/ RW and BD-RE media that ensures noise-free recording time and time again.

A specially created tough coating for DVD media and Blu-ray Discs that is superbly resistant to harmful scratches.

A tough, clear surface layer for increased protection against accidental surface damage.

Metal Ablative Recording Layer. A specially created inorganic recording layer present on Verbatim's BD-R media ensures excellent recording compatibility and prolonged stability for archival life.

CD-R and DVD-R targeted toward the medical industry for storing valuable patient information. Using tighter specifications for better compatibility and recording quality. Uses AZO.
