MATERIAL

AlSi 304 stainless steel, sandblasted matte finish. Welded hub.

HUB CAP

Technopolymer, black colour.

STANDARD EXECUTION

Hub, H9 reamed hole with end grooving. Handle 1.280 (see page 394) in Duroplast.

FEATURES AND APPLICATIONS

The stainless steel crank handles GN 369.5 are particularly suitable for use in corrosive environments.

The transverse groove easily transfers rotational motion to the shaft through a transverse pin mounted on the shaft.

SPECIAL EXECUTIONS ON REQUEST

Hub without end grooving.
