

Part Number: 6.68.18 CORTEX-M TRACE REFEREN

Description: Cortex-M Trace Reference Board

The SEGGER **Cortex-M Trace Reference Board** is designed to enable the quick set up of a reference project when making use of a J-Link or J-Trace unit. This is a Cortex-M4 reference board which includes support for the Embedded Trace Macrocell (ETM).

- ST STM32F407VE
- ARM Cortex-M4F
- External 19-Pin, 0.05 inch debug header with trace pins
- Test points for trace signals

If a J-Link EDU/BASE/PLUS/ULTRA+/PRO is to be used with this reference board, a J-Link 19-Pin Cortex-M Adapter ([8.06.00](#)) is required.
