USB2 A Screw Termination Keystone Socket

KUA2bk

KUA2wh

Suitable for field termination, repair and prototyping applications this 'DIY' socket enables an easy termination where a USB port is required. The 'breakout' board brings out all signal pins and the shield to screw-down terminal blocks for simple and reliable connection without the need for special tools.

Features

- USB2.0 A female connector to 4 x screw terminals and choice of 2 x earth points

- Easy-to-read marking simplifies correct termination

- Screw terminals accommodate wires 0.4-1.3mm (16-26 AWG) diameter

- Snap in keystone jack provides a clean and neat, fast and easy installation in a wide range of housings, outlets and patch panels

- Available as part of our Panel Mount and D UNIVERSAL ranges

Specifications

- Rated to 500mA at 5V

- Suitable for transmission at speeds up to 60MB/sec

- Weight: 6g approx.

- Dimensions: 16.9 x 21.8 x 28.4mm

- Colour: available in black or white

NOTE: This item is intended for data transmission not for charging

- Material:
    Housing: UL94V2 ABS
    USB socket: nickel-plated brass
    PCB: FR-4

Packaging: individually poly bagged then in 20's
