## ZVZF200

Part Number

- Compact M18 standard format with IP67 protection
- Continuous mode or flash mode synchronized with the camera
- Homogenous illumination of small areas

wenglor spotlights are ideally suited for vision applications in which only small areas need to be homogeneously illuminated. They can be operated in the continuous mode, or synchronized to the camera in the flash mode. Above all in applications where space is limited, users profit from the compact M18 format.
