

The **BERNSTEIN PO/PL** Pendant Control Station range offers exceptional price-performance benefits. Off-the-shelf availability and a comprehensive range make them ideally suited for use in a variety of applications including: Scissor Lifts, Cranes, Dock Levellers, Vehicle Tail-lifts, Winches etc.

Operator fatigue is reduced through the ergonomic design of the robust housings which are made from high impact, self extinguishing plastic and sealed to IP65. All versions include cable clamping and strain relief as standard together with a steel suspension hanger.

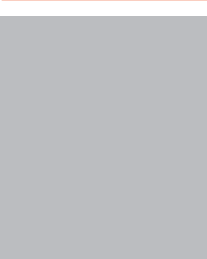

Contact modules rated at 16A are easily mounted, allowing up to three stepped switch positions on each button. A built-in mechanical interlock between pairs of buttons prevents unintentional simultaneous operation.

Other models include the direct motor control model PTRM, with optional capacitor mounting space in the handle.

A rapid customising service is also available, for an immediate quotation please contact the **BERNSTEIN** sales team on 01922 744999.

	Description	Article No.
