M12 connectors: B-coded (male and female)	Profibus DP piggyback connector (PG)
Shielding: 1-on-1 every connector	DB9 straight male connector
	12Mbps signal
Specifications: The Tap Connector DB9-M12 is a utility to connect ProfiTrace to a DP network which is equipped with M12 connectors. The connector has been designed not to cause network disturbance due to spur lines. It has a 180 degrees DB9 connector and B-male and female M12 connectors to enable universal use.	Specifications: The Tap Connector is a small cable to connect the ProfiCore to a PROFIBUS DP network. It has been designed NOT to cause network disturbance due to spur lines. A perfect vertical position for the ProfiCore is obtained that does not overpressure the piggyback plug which is attached to the DP network.
