MATERIAL

C10 zinc-plated steel.

RIVETS AND PINS

Zinc-plated steel.

HEXAGON-SOCKET HEAD SCREWS WITH COUNTERSINK FOR CYLINDER SUPPORT

Black-oxide steel.

CYLINDER SUPPORT BUSHING

Hardened steel.

ROTATING PIN AND SEEGER RINGS

Hardened steel.

STANDARD EXECUTIONS

- **PVC-APV3**: with open clamping lever and two folded washers.
- **PVC-APVM**: with magnetic cylinder, open clamping lever and two folded washers.
- **PVC-EPV3**: with solid clamping lever retainer for welding.
- **PVC-EPVM**: with magnetic cylinder, solid clamping lever and retainer for welding.

MAXIMUM WORKING PRESSURE

6 bars.

MAX WORKING TEMPERATURE

80°C.

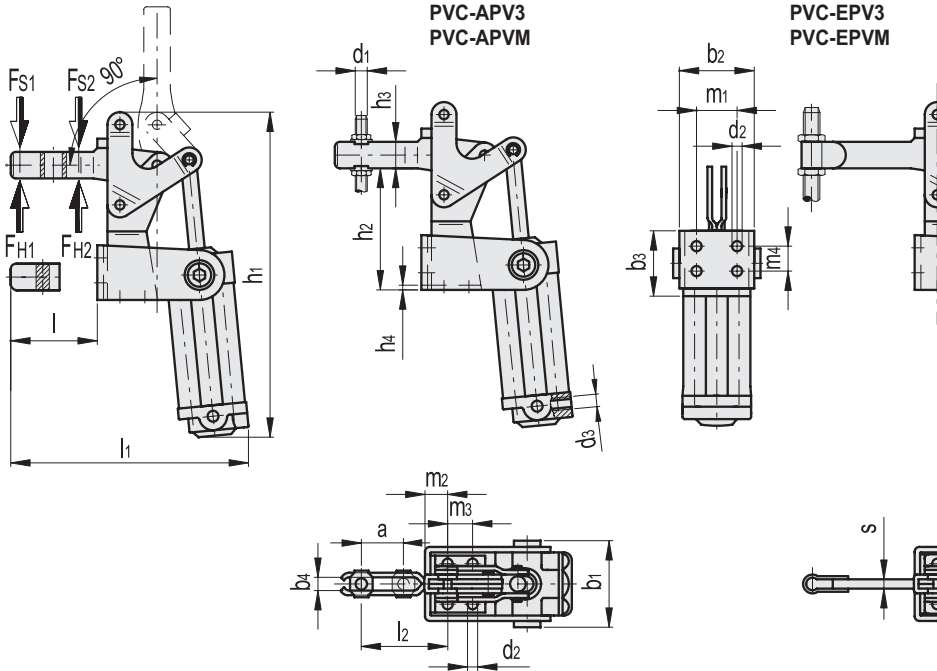

CLAMPING BOLTS

To be ordered separately.

FEATURES AND APPLICATIONS

All articulated joints are lubricated with special grease. PVC. pneumatic clamps can be installed on two different fixing surfaces. Executions PVC-APVM and PVC-EPVM (with magnetic cylinder), equipped with limit switches type PSW. (see page 1506) (to be ordered separately) gives drive and/or control impulses while active. Using a lubrication filter assembly is necessary for the cylinder to work properly for a long time, whereas flow regulators are recommended to guarantee long life of mechanical components.

PVC-APV3
