

ANGLED TROUGH

A NEW ANGLE ON PULLING WIRES

The new Hoffman Angled Trough cuts total installation time by 80%. It eliminates the need for costly 90-degree conduit bends and offers flexibility for wire distribution, making it a time and cost saving solution for contractors.

The Angled Trough is the enclosure that alleviates the labor, time, cost, and manpower it takes to make 90 degree conduit bends down to a large MCC center, and allows us to meet our job deadlines much easier.

Greg Bills, Sr. Applications Engineer Walker Industrial

APPLICATIONS:

Wire distribution, junctions and terminations in a variety of indoor commercial applications. The Angled Trough is suitable for applications above, below or to the side of electrical panels in electrical rooms, above modular ceilings, and as a more flexible alternative to the traditional trough.

MEASURABLE SAVINGS:

- No need to buy expensive 90-degree conduits, pre-fab or bend conduits at job site
- Faster cover install with only half the number of screws

FEATURES:

- Flexible install allows conduit runs through six sides of enclosure, including the front
- Patented* angled design does not take up valuable real estate on the wall
- Easy mounting via holes on the back of the enclosure
- Unique design is easy to assemble and offers a removable cover
- Shipped completely assembled with no end caps to install
