

Acrylic protective wall

Height 600 mm and 950 mm

Application:

Protect your employees and customers with our plexiglass protection screens. Protection against undesired transmission by means of airborne infection, e.g. by spitting or sneezing. Can be set up on counters, bars, reception desks and shops.

Execution:

- Clear acrylic, 4 mm
- Laser cut
- Polished edges
- Height of 600 mm suitable for chest-high counters
- Height of 950 mm suitable for waist-high counters
- Service hatch 200x100 mm

Advantage:

- Protective film on both sides
- Protection against undesired transmission by means of airborne infection
- High degree of safety during mutual interaction
- The service hatch enables product handover, payment or lodgement
