

## Specifications

Temperature Coefficient
Short-time Overload
Min. Insulation Resistance
Dielectric Withstanding Voltage
Terminal Bending
Soldering Heat
Min. Solderability
Temperature Cycling
Humidity (Steady State)
Load Life in Humidity
Load Life

## Features

Compliant

- Small size and lightweight
- Suitable for both flow and reflow soldering
- Reduction of assembly costs and matching with placement machines

Standard : 2, 5 and $10 \%$ - A series

$$
: 1 \%-B \text { series }
$$

## Marking on the Resistors Body:

- For 0402 size, no marking on the body due to the small size of the resistor.
- $\pm 5 \%$ tolerance product. (Including resistance values less than $1 \Omega$; both $1 \%$ and $5 \%$ ) The marking is 3 digits, the first 2 digits are the significant figures of the resistance and the 3rd digit denotes number of zeros.
$153=15,000 \Omega=15 \mathrm{~K} \Omega 120=12 \Omega$

Below $10 \Omega$ shown as this: 6 R8 $=6.8 \Omega$

$0.1 \Omega$ to $0.99 \Omega$ shown as this: $\mathrm{R} 33=0.33 \Omega$

Newark.com/multicomp-pro
Farnell.com/multicomp-pro
Element14.com/multicomp-pro
multicomprno

- $\pm 1 \%$ tolerance marking of case size 0805 and bigger is 4 digits, the first 3 digits are the significant figures of the resistance and the 4th digit denotes number of zeros.
$2372=23700 \Omega=23.7 \mathrm{~K} \Omega ; 1430=143 \Omega \quad$ Below $10 \Omega$ shown as this: $3 R 24=3.24 \Omega \quad 0.1 \Omega$ to $0.99 \Omega$ shown as this: $\mathrm{R} 33=0.33 \Omega$
 R33
- Standard B series values ( $\pm 1 \%$ tolerance) of 0603 size. Due to the small size of the resistor's body, 3 digits marking will be used to indicate the accurate resistance value by using the Multiplier code \& Standard B Series Resistance Value Code.
$1.96 \mathrm{~K} \Omega=196 \times 10^{1} \Omega=29 \mathrm{~B}$
29B
$12.4 \boldsymbol{\Omega}=124 \times 10^{-1} \boldsymbol{\Omega}=10 \mathrm{X}$
10X
- Standard A series values which does not belong to $B$ series values (in $\pm 1 \%$ tolerance) of 0603 size The marking is the same as $5 \%$ tolerance but marked with underline.
$\underline{122}=1200=1.2 \mathrm{~K} \Omega$
$\underline{680}=68 \Omega$

Part Number Explanation

Chip resistor types
Normal size
Small size Resistance Value
: 0402, 0603, 0805, 1206, 1210, 2010, 2512
: WG=1/16W, W2=1/2W, 1W=1W
: SA=1/10W-S, S8=1/8W-S, S4=1/4W-S, S3=1/3W-S
: A-series :
$1^{\text {st }}$ digit is " 0 "
$2^{\text {nd }} \& 3^{\text {rd }}$ digits are significant figures of the resistance
$4^{\text {th }}$ indicate the number of zeros
: B-series :
$1^{\text {st }}$ to $3^{\text {rd }}$ digits are significant figures of the resistance
$4^{\text {th }}$ digit indicate the number of zeros "J" to 0.1 , " $K$ " to 0.01 , " L " to 0.001
Ex. 012 J to $1 \Omega 2,226 \mathrm{~K}$ to $2 \Omega 26$
Jumper : use " 0 " for 1 st to $4^{\text {th }}$ digits
: $0=$ Jumper, $F= \pm 1 \%$
Tolerance
Packing Type
Packing Quantity
Special Feature
: T = Tape / reel
$: 4=4,000$ pieces, $5=5,000$ pieces, $C=10,000$ pieces
: $\mathrm{E}=$ lead $(\mathrm{Pb})$ free plating type
