4MM SHROUDED SOCKET FITTING TOOLS

A pair of fitting tools are available to aid in the fitting of these sockets to panels and to boxes. These two tools (a holding wrench and nut wrench) are used together (order codes shown below).

Firstly, fit your socket to the panel and tighten up the nut, now push the holding wrench into the socket and twist to allow the two pins to fit into the two holes in the bottom of the socket. Then use the nut wrench to tighten the nut on the socket.
