The THD 10WIN series is designed for an optimized cost/performance ratio of DC/DC converters with output power of 10 Watt.
They come with an internal EMI-filter to meet EN55022, class A without external components. General features like no minimum load requirement, overload protection and high efficiency make these converters easy to design in. With the popular DIP-24 standard package they are also a drop in replacement for many cost critical applications.
