

Transducer Potentiometric

TX2

Pivot Head Mounting up to 300 mm

Special Features

- Compact dimensions Ø 16 mm
- Protection class IP67
- Easy to assemble via low backlash pivot heads with a large angle of freedom (up to ±12.5 degrees)
- Very long life up to 50 million movements
- Outstanding linearity up to ±0.05 %
- Suitable for harsh environmental conditions (humidity, oil, dust)
- Cable or plug connection optional
- For transducers with mounting clamps series TX2, see separate data sheet

Applications

• Mobile working machines (industrial trucks, construction machinery, agricultural and forestry machinery)

High protection class and very compact dimensions characterize this inexpensive transducer. The heavy-duty design together with metal flanges and double sealed actuating rod make the TX2 Series an ideal choice for applications used in adverse environments with dirt, dust and humidity.

Users with mobile applications can especially benefit from the TX2 Series' pivot-head mounting.

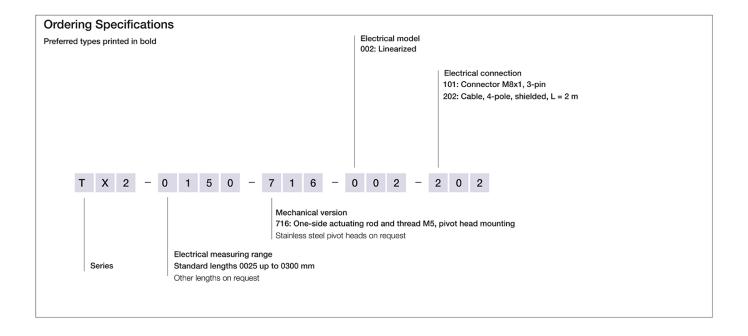

The electrical connection is made by radial plug connector or radial cable.

For transducers with and without return spring and mounting clamps, central thread or flange plates see separate TEX Series data sheets.

Important:

All values specified in this data sheet for linearity, lifetime and temperature coefficient are only valid for a sensor used as a voltage divider with virtually no load applied to the wiper (le $\leq 1 \mu A$).

400054174	MUK-350-6	± 10 V

MAP-4000

Multifunctional measuring device with digital display for direct connection of potentiometric and normalized signals.

- \bullet Supply voltage 10...30 VDC, 80...250 VDC or AC
- High accuracy up to 0.1%
- Adjustable supply voltage for sensors 5...24 V
- Temperature coefficient 100 ppm/K
- Optional RS 232, RS 485, analog output, limited switch
- Complete data see separate data sheet

Product Models on request

Product variant TX2 with bellows

Version with bellows to protect the actuating rod from contamination in environments heavily exposed to media
